

HotBelt™ Wrap-Around Refrigerant Jug Warmer**Product Highlights**

- ✓ Pre-heat and keep refrigerant jug cylinders warm when servicing HVAC systems in cold weather
- ✓ Ensure adequate pressure from refrigerant jug to A/C or refrigeration system during cold weather servicing
- ✓ Ideal for portable field service use
- ✓ Built-in preset thermostat for easy plug-and-play use
- ✓ Exceptional flexibility, durability, and heat uniformity
- ✓ Rapid heat-up and thermal response
- ✓ Adjustable fit design with hook & loop strap fits common sizes of refrigerant jugs: 30lb, 50lb, and 125lb
- ✓ Moisture and chemical resistant fiberglass reinforced silicone rubber
- ✓ Patented grounded heating element

Specifications

- Preset thermostat: Designed to maintain surface temperature at 120°F (49°C) in 32°F (0°C) ambient conditions*
- Power density: 1.4 W/in² (0.002 W/mm²)
- Power cord: 6ft (2 m) cord with power plug
- Fits standard cylinders: 30lb, 50lb, and 125lb
- Adjustable strap fits cylinder diameters: Minimum 9" (229mm); Maximum 13" (330mm)
- Width: 6" (152mm)
- Length: 26" (660mm)
- Heater ingress protection rating: IP54

* Variations in ambient temperature and material contents within the cylinder may affect actual surface temperature of the cylinder.

HOTBELT™
